

Chemistry and Chemical Biology
CHEM 2OB3
Organic Chemistry II
Winter 2027

SCIENCE

Instructor Information

R. Turner - Course Coordinator
Email: orgochem@mcmaster.ca

Course Information

Lectures:

- T, Th, F (starting Jan 4), 8:30 – 9:20 AM

Labs:

- Monday to Friday (biweekly starting Jan 11), 2:30 – 5:20 PM

Tutorials:

- Thursday (weekly starting Jan 11), 1:30 - 2:20 PM

Office Hours:

- Course Instructor: TBD

Note – This course will run fully in-person in accordance with university directives and strict health and safety guidelines. It is the expectation that students be prepared to attend all lectures, labs, tutorials, examinations, and other evaluations in-person.

Course Dates: 01/04/2027 - 04/07/2027

Units: 3.00

Course Delivery Mode: In Person

Course Description: Nucleophilic substitutions at carbonyl centres, aromatic chemistry, carbohydrates, applications of spectroscopic techniques in organic chemistry. Three lectures, one lab (three hours) every other week; one tutorial (one hour) every week; one term Prerequisite(s): One of CHEM 20A3, 20C3, 20G3, CHEMBIO 20A3, 20G3 Registration priority will be given to students for whom this course is a program requirement. Antirequisite(s): CHEM 20D3, CHEMBIO 20B3, 20D3 Not open to students registered in Honours Chemical Biology. Not open to students with credit or registration in BIOCHEM 3CM3.

Statement on Equity, Diversity, and Inclusion:

The CHEM 20A3 instructional team embraces the diversity of our students and understands that your distinct backgrounds, experiences, and viewpoints enrich our classroom. We view this diversity as a resource and strength knowing that our community benefits from everyone being able to express their perspectives as individuals and not as a representative of any category. Our intent is to deliver a course that is well-served by all student and to provide a supportive learning environment in which each student's diversity in terms of race, ethnicity, nationality, culture, religion, spirituality, gender identity, sexual orientation, learning or physical abilities, socioeconomic status, or age are respected. We aim to provide course resources and evaluations using formats that are accessible to all students. We encourage students to come forward if they encounter or observe any barriers to your inclusion in the classroom, laboratory or course activities. Your suggestions are encouraged and appreciated so that we can continuously improve on providing an inclusion environment for all students.

Instructor-Specific Course Information

Avenue to Learn

Avenue to Learn (A2L) will be used for electronic distribution of all course content including announcements, course information, lecture notes, pre-recorded lectures, recordings of problem-solving and student response sessions, adaptive

practice (via WileyPLUS), practice problems, answers keys, etc. Lab report submissions and grading will be done on Avenue2Learn.

Crowdmark

Crowdmark (www.crowdmark.com) is an online platform available to all students within the course that will be used for the electronic grading of tests and examinations.

Microsoft Teams

Microsoft Teams will be used as a forum for discussion with the instructional team via a chat board and virtual sessions (e.g., problem-solving, student response, Help Centre) throughout the semester. Microsoft Teams is available for free via the Office 365 subscription accessible to all McMaster students.

Important Links

- [Mosaic](#)

- [Open Education Resources](#)

Course Learning Outcomes

- Examine the chemical behaviour, structural chemistry and reactivity of a series of organic functional groups including: alcohols, ethers, aromatics, carbonyls, carbohydrates, carboxylic acids and enols/enolate
- Develop problem solving strategies to determine chemical structure and to assemble more complex organic molecules
- Acquire laboratory skills and techniques required to investigate experimental problems in organic chemistry

Required Materials and Texts

Please sign in with your MacID [here](#) to view your booklist

Organic Chemistry

Authors: David Klein

Edition: 5th Edition

The textbook for this course is available through the Campus Store Immediate Access program, providing access to the textbook and WileyPLUS through Avenue to Learn. If you took Chem 2OA3 in Fall 2026, you should still have access to this resource. Please contact the Campus Store at optout@mcmaster.ca for more details about the immediate access program.

Stemble

Online lab submission and management platform. Included as a part of the immediate access program. Students pay for this per semester and will be automatically enrolled in it through the immediate access program

Lab Notebook (Required)

Bound notebook (no spiral-bound), dedicated only to Chem 2OA3/2OB3 labs.

The preferred notebook is sold at the McMaster bookstore

MolyMod Molecular Model Set

The Campus Store has this kit available but ANY model kit can be used

Safety Goggles (Required)

UVEX Stealth safety goggles

Lab Coat (Required)

Standard long sleeve lab coat

Class Format

In Person

Virtual Tutorial Delivery

To follow and participate in virtual tutorials it is expected that you have reliable access to the following:

- A computer that meets performance requirements found here.
- An internet connection that is fast enough to stream video.
- Computer accessories that enable class participation, such as a microphone, speakers and webcam when needed.

If you think that you will not be able to meet these requirements, please contact uts@mcmaster.ca as soon as you can. Please visit the [Technology Resources for Students](#) page for detailed requirements. If you use assistive technology or believe that our platforms might be a barrier to participating, please contact Student Accessibility Services, sas@mcmaster.ca, for support.

Course Evaluation

Course Assessment Breakdown

Assessment	Percentage (%)
Virtual Quizzes	5
Adaptive Practice	5
Labs	15
Term Tests	30
Final Examination	45
Total	100

Course Evaluation Details

In order to pass the course, the following criteria must be met: (1) a final grade $\geq$ 50 %; (2) the final examination MUST be written; and (3) a minimum of 4 of 5 experiments MUST be attended, and lab reports completed.

Adaptive practice, student response and the term test are OPTIONAL. Late assessments will not be accepted, and rewrites of the term tests will not be allowed. If you elect not to take part in these assessment(s), then the value of these assessment(s) will automatically be placed onto the final exam. Students DO NOT need to obtain an MSAF for missing these assessment(s) as universal accommodation grading schemes are in place for these assessments (see below).

Grade inquiry periods will be held within the semester for the midterm test.

Details will be posted to A2L throughout the semester with respect to specific deadlines and item. *Inquiries regarding lab reports must be addressed within 5 business days of the return of the graded report unless explicitly specified otherwise on A2L.*

Final grades for CHEM 20B3 will automatically be calculated using the following formulas and the BEST final grade will be awarded for each student:

OPTION 1 AP (5 %) + Q (5 %) + T1 (15 %) + T2 (15 %) + L (15 %) + F (45 %)

OPTION 2 AP (5 %) + T1 (15 %) + T2 (15 %) + L (15 %) + F (50 %)

OPTION 3 AP (5 %) + Q (5 %) + T1 (15 %) + L (15 %) + F (60 %)

OPTION 4 AP (5 %) + Q (5 %) + T2 (15 %) + L (15 %) + F (60 %)

OPTION 5 Q (5 %) + T1 (15 %) + T2 (15 %) + L (15 %) + F (50 %)

OPTION 6 AP (5 %) + T1 (15 %) + L (15 %) + F (65 %)

OPTION 7 AP (5 %) + T2 (15 %) + L (15 %) + F (65 %)

OPTION 8 Q (5 %) + T1 (15 %) + L (15 %) + F (65 %)

OPTION 9 Q (5 %) + T2 (15 %) + L (15 %) + F (65 %)

OPTION 10 T1 (15 %) + T2 (15 %) + L (15 %) + F (55 %)

OPTION 11 AP (5 %) + Q (5 %) + L (15 %) + F (75 %)

OPTION 12 AP (5 %) + L (15 %) + F (80 %)

OPTION 13 Q (5 %) + L (15 %) + F (80 %)

OPTION 14 T1 (15 %) + L (15 %) + F (70 %)

OPTION 15 T2 (15 %) + L (15 %) + F (70 %)

OPTION 16 L (15 %) + F (85 %)

Abbreviations: Adaptive practice (AP), Virtual quizzes (Q), Term Test 1 (T1), Term Test 2 (T2), Lab (L), Final Examination (F)

Examinations

- Test 1 - Friday February 5
 - (15%) 1.5 hours
- Test 2 - Friday March 12
 - (15%) 1.5 hours
- Final Examination: Scheduled by the Registrar
 - (45%) 2.5 hours
- All examinations will be conducted in-person. The McMaster standard calculator (Casio FX-991 MS or MS Plus models) and molecular models kits (packaged in a clear plastic bag) are the **ONLY** acceptable aids allowed during exams. The final examination **MUST** be written in order to pass the course.
- Students registered with Student Accessibility Services (SAS) with an accommodation for extra time to complete exams will be assumed to write their exam in the SAS Test Centre by activating their accommodation letter for the course. **Students booking a test through SAS must ensure their test time is either before or during the write times listed above.** Full details about your exam can be found in the SAS student portal. Please direct all questions about the writing of your exam to the SAS Test Centre.
- Students who are unable to attend the term test due to an academic, varsity athletic, or religious commitment, may be permitted to take part in an early write exam. To be granted access to the early write exam, you **MUST** make arrangements with the course coordinator (orgochem@mcmaster.ca) 2 weeks in advance of the exam date.

Virtual A2L Quizzes (5%)

- There will be 6 virtual **A2L quizzes**, that will open at 12:00 pm (noon) on the weeks indicated in the schedule below. These quizzes are **due 48 hours after opening at 12:00 pm (noon) on the following Wednesday**. All students are provided with an **automatic 48-hour grace period from Wednesday at 12:00 pm until Friday at 12:00 pm (noon)** to complete and submit their quiz. There are no penalties for quizzes submitted during the grace period. Further

extensions past Friday at 12:00 pm will not be provided. These quizzes are designed to take one hour to complete, but there is no enforced time limit beyond the opening and closing of the quiz.

- It is strongly recommended but **OPTIONAL** that you take part in these quizzes. Student response quizzes are worth 5% of your final grade and your grade will be determined by using the **best 5 out of 6 virtual quizzes**.

Quiz Number	Date Open	Due Date	Date Closed
1	Jan 18	Jan 20	Jan 22
2	Feb 1	Feb 3	Feb 5
3	Feb 22	Feb 24	Feb 26
4	Mar 8	Mar 10	Mar 12
5	Mar 22	Mar 24	Mar 26
6	Apr 5	Apr 7	Apr 9

Adaptive Practice (5%)

- An adaptive practice homework platform available via WileyPLUS will be utilized in the course. WileyPLUS is a part of the textbook package for Organic Chemistry – 5th edition by David Klein sold via the Campus Store or can be purchased separately online from the Wiley website. It is strongly recommended but **OPTIONAL** that you complete the adaptive practice homework. The adaptive practice problems are a unique database of questions, with hundreds of questions per chapter, which are NOT found in the textbook. To take full advantage of using this self-assessment study tool, we advise that you work through the lectures and in-text questions in the textbook, and then use the adaptive practice to evaluate your overall comprehension of the chapter material. For any issues regarding WileyPLUS please contact orgochem@mcmaster.ca OR contact wileyPLUS support.
- Adaptive practice is worth 5% of your final grade and marks will be allocated based on the **TOTAL number of progress points** obtained on **ALL the WileyPLUS assignments** throughout the semester. Adaptive practice will include assignments for Chapters 10, 12, 13, 16-21, 24 and 25. Points are earned based on your student progress through each assignment, which considers your response to each question, the difficulty of the question and your history in responding to each learning objective included in the assignment. There are no specific numbers of questions that must be completed for each individual chapter but points are distributed based on your highest level of student progress achieved: 100% progress = 10 points, 80-99% progress = 8 points, 50-79% progress = 6 points, < 50% progress = 0 points. The overall adaptive practice grades will be calculated at the end of term according to the following table:

WileyPLUS Grade Breakdown

Total Progress Points (%)	Adaptive Practice Mark
80-100	5.0
65-79	4.0
50-64	3.0
35-49	2.0
<35	0.0

Note – some chapter sub-sections have been excluded from the WileyPLUS assignments to limit the time required to complete these assignments. The sub-sections included in the WileyPLUS assignments have been selected to best develop the problem-solving skills needed in organic chemistry BUT DO NOT reflect the sole content that you are responsible to know in the course!!!

All adaptive practice assignments are due on selected Wednesdays by 11:45 PM on the following dates:

WileyPLUS CHAPTER	DUE DATE
10	January 13
12	January 20
13	January 20
16	January 27
17	February 3
18	February 10
24	March 3
19	March 10
20	March 24
25	March 31
21	April 7

Laboratories (15%)

- In-person experiments are 3 hours in duration and are held Monday to Friday at 2:30 – 5:20 PM (starting the week of Jan. 11th). You **MUST** attend the lab section posted in your timetable on Mosaic. If you have a conflict with your

lab section, check on Mosaic to see if it is possible to change to another lab section (before the add/drop deadline). If space is not available in another section, contact the course coordinator as soon as possible with your documented conflict. Your lab section, room number, bench number and teaching assistant (TA) will be posted in your gradebook on Avenue after the add/drop deadline. Please review manual information posted to A2L/Stemle for more details on lab preparation and requirements

- In-person lab reports will be **submitted to Stemle for grading**. All lab reports are due the day of your lab section by 11:45 PM, but all students will receive a penalty-free 24 h extension until 11:45 PM the day following their lab.
 - **A late penalty of 10% per day** will be applied to lab reports submitted following the universal extension. Reports later than 5 days will be given a grade of zero.
- The laboratory component is worth 15% of your final grade. To pass the laboratory portion of the course, students MUST attend and complete all five lab reports for the in-person experiments. Completion of each experiment involves the submission of a lab report in which all required components (as detailed in the lab manual) have been completed. Lab reports with significant components missing will NOT be considered complete and WILL NOT be accepted for marks.
- **Please see the missed work policy on what to do if you miss a lab!!**
- You are responsible for completing lab reports on YOUR OWN! Solutions CANNOT be completed within a group collaboration, obtained from an online tutor website, copied from posts within a group chat, or copied from students who have completed the course previously (see below for further information on McMaster's Academic Integrity Policy)!

Lab Exemptions

Students who have previously taken the course may be granted a lab exemption if they fall into one of the following categories

Category 1:

1. You must have attended all 5 experiments within the semester AND submitted all 5 lab reports
2. You must have taken Chem 20B3 between Winter 2023 and Winter 2025

Category 2:

1. You have completed Chem 20B3 during one of the following semesters:
 1. Summer 2025
 2. Winter 2026
 3. Summer 2026
2. You have completed a minimum of 4 experiments
3. You have WRITTEN the final exam for Chem 20B3 during the semester you completed the labs- Your exam grade will be used as the grade for your 5th missing report.

ALL criteria of a given category MUST be met in order to qualify for a lab exemption consideration. If you meet those criteria submit email orgochem@mcmaster.ca with your name, your student number (9 digits), and the semester you last took Chem 20B3 and fulfilled the exemption criteria (e.g., Winter 2024) BEFORE JAN 8 AT 12:00 PM (NOON). Your lab exemption will be considered and you will be notified of the result before labs begin in the semester- students who have a lab exemption will need to ensure that this change is reflected on Mosaic. More details will be provided to students after contacting orgochem@mcmaster.ca.

Undergraduate Grading Scale

The grades breakdown for McMaster's 12-Point Grading Scale

Grade	Equivalent Grade Point	Equivalent Percentages
A+	12	90-100
A	11	85-89
A-	10	80-84
B+	9	77-79
B	8	73-76
B-	7	70-72
C+	6	67-69
C	5	63-66
C-	4	60-62
D+	3	57-59
D	2	53-56
D-	1	50-52
F	0	0-49

Graduate Grading Scale

Graduate Student Grading Scale (Except for MBA and Master of Finance)

Grade	Points	Equivalent Percentage	Pass/Fail
A+	12	90-100	P+
A	11	85-89	P
A-	10	80-84	
B+	9	77-79	
B	8	73-76	
B-	7	70-72	
F	0	69 and under	F

MBA and Master of Finance Grading Scale

Grade	Points	Equivalent Percentage	Pass/Fail
A+	12	90-100	P+
A	11	85-89	P
A-	10	80-84	
B+	9	75-79	
B	8	70-74	
B-	7	60-69	
F	0	59 and under	F

Course Schedule

Course Content

In CHEM 2OB3, you will build on the foundation built during organic chemistry I. This course is designed for non-chemists, particularly those whose interests are biological. Rather than consider systems, this course examines how organic chemists manipulate functional groups to create and manipulate organic molecules. There are two basic elements to the course: (1) extend your knowledge of and learn some new ground rules of chemical behavior (e.g., solubility, acidity), structural chemistry (e.g., spatial and electronic distribution in molecules, structural determination using spectroscopy) and reactivity (e.g., identify the most reactive sites within molecules, understand the driving forces behind organic reactions); and (2) develop problem-solving strategies towards the transformation of a variety of functional groups, the identification of reaction products, and the

assemble of more complex molecules using the toolbox of reactions studied within the course.

Lectures and course notes are the best resources to inform yourself on the topics that will be emphasized in the course. The course textbook, *Organic Chemistry – 5th edition by David Klein*, should be used to further your understanding of the course topics. The following list provides a general outline that will be covered and the associated chapter information from the textbook. Make sure to stay up to date with the lectures and course notes to know which topics will be emphasized in the course.

The table below also contains an approximate schedule that should be followed to prepare yourself for the laboratory exercises, student response sessions and examinations.

	Monday	Tuesday	Wednesday	Thursday	Friday
January					
WEEK 1 No Labs	4 Classes Begin	5	6	7	8
WEEK 2 Expt. 1 (Week 1)	11 Labs begin	12	13 WileyPLUS Chapter 10 Due	14	15
WEEK 3 Expt. 1 (Week 2)	18	19	20 Quiz 1 Due	21 WileyPLUS Chapters 12 and 13 Due	22
WEEK 4 Expt. 2 (Week 1)	25	26	27 WileyPLUS Chapter 16 Due	28	29
February					
WEEK 5 Expt. 2 (Week 2)	1	2	3 Quiz 2 Due	4 WileyPLUS Chapter 17 Due	5 Term Test 1
WEEK 6 Expt. 3 (Week 1)	8	9	10 WileyPLUS Chapter 18 Due	11	12
READING BREAK No Classes	15 Family Day	16 Midterm Recess	17 Midterm Recess	18 Midterm Recess	19 Midterm Recess
WEEK 7 Expt. 3 (Week 2)	22	23	24 Quiz 3 Due	25	26

March						
WEEK 8 Expt. 4 (Week 1)	1	2	3	WileyPLUS Chapter 24 Due	4	5
WEEK 9 Expt. 4 (Week 2)	8	9	10	Quiz 4 Due	11	12

				WileyPLUS Chapter 20 Due		Good Friday
April						
WEEK 12 Make-Up Labs	29	30	31	WileyPLUS Chapter 25 Due	1	2
		Make-Up Labs (TBA)	Make-Up Labs (TBA)			
WEEK 13 No Labs	5	6	7	Quiz 6 Due	8	9
				WileyPLUS Chapter 21 Due		

Laboratory Overview, Operation, and Safety

Lab Safety – In order to work in the lab, students MUST adhere to the following safety rules:

- Safety goggles must be worn at all times in the laboratory.
- Students must have their arms covered either by wearing a lab coat (strongly recommended) or a long-sleeve shirt.
- Students must wear long pants or a skirt. Shorts or capris are not acceptable attire.
- Students must have shoes that completely cover their feet including the entire upper foot, toes and heels. Sandals, open-toed shoes, ballerina shoes (flats) and shoes with cut-outs or openings are not acceptable attire. Due to slipping hazards, shoes or boots with heels are strongly discouraged.

Absences, Missed Work, Illness

Requests for Relief for Missed Academic Term Work:

- McMaster Student Absence Form (MSAF): In the event of an absence for medical or other reasons, students should review and follow the Academic

Regulation in the Undergraduate Calendar "Requests for Relief for Missed Academic Term Work".

Course Specific MSAF Information:

Course Specific MSAF Information

Missed Work	MSAF Needed?	Result
Lab		For one missed lab – the weight of the lab report will be moved to the exam automatically and students will not be able to attend a makeup session. Please complete your pre-lab quiz still.
	One missed lab – NO	For two or three missed labs – students must attend a makeup session for ONE or TWO makeup labs respectively (such that 4/5 labs are complete). Ensure you still complete the prelab quizzes for all missed labs.
	<u>Two</u> or more missed labs – YES	For four or more missed labs please contact orgochem@mcmaster.ca as soon as possible. Ensure you still complete the prelab quizzes for all missed labs.

Missed Work	MSAF Needed?	Result
Quiz	No	Only the best 5/6 quizzes will be used to calculate your quiz grade.
Test	No	If you are unable to attend the test, the weight of the test will be moved to the final exam automatically.
Adaptive Practice	No	Not all wileyPLUS chapters need to be completed in order to receive full grades on the adaptive practice. Please review the wileyPLUS thresholds listed above. Missed chapters in wileyPLUS will not be provided with an extension.
Final Exam	MSAF not available	

Turnitin.com

Some courses may use a web-based service (Turnitin.com) to reveal authenticity and ownership of student submitted work. For courses using such software, students will be expected to submit their work electronically either directly to Turnitin.com or via an online learning platform (e.g. A2L, etc.) using plagiarism detection (a service supported by Turnitin.com) so it can be checked for academic dishonesty.

Students who do not wish their work to be submitted through the plagiarism detection software must inform the Instructor before the assignment is due. No penalty will be assigned to a student who does not submit work to the plagiarism detection software. All submitted work is subject to normal verification that standards of academic integrity have been upheld (e.g., on-line search, other software, etc.). For more details about McMaster's use of Turnitin.com please go to www.mcmaster.ca/academicintegrity.

Course Modification

The instructor and university reserve the right to modify elements of the course during the semester. The university may change the dates and deadlines for any or all courses in extreme circumstances. If either type of modification becomes necessary, reasonable notice and communication with students will be given with explanation and the opportunity to comment on changes. It is the responsibility of the student to check their McMaster email and the course website weekly during the semester and to note any changes.

Generative AI: Use Prohibited

Students are not permitted to use generative AI in this course. In alignment with [McMaster academic integrity policy](#), it “shall be an offence knowingly to ... submit academic work for assessment that was purchased or acquired from another source”. This includes work created by generative AI tools. Also state in the policy is the following, “Contract Cheating is the act of “outsourcing of student work to third parties” (Lancaster & Clarke, 2016, p. 639) with or without payment.” Using Generative AI tools is a form of contract cheating. Charges of academic dishonesty will be brought forward to the Office of Academic Integrity.

APPROVED ADVISORY STATEMENTS

Academic Integrity

You are expected to exhibit honesty and use ethical behaviour in all aspects of the learning process. Academic credentials you earn are rooted in principles of honesty and academic integrity. **It is your responsibility to understand what constitutes academic dishonesty.**

Academic dishonesty is to knowingly act or fail to act in a way that results or could result in unearned academic credit or advantage. This behaviour can result in serious consequences, e.g. the grade of zero on an assignment, loss of credit with a notation on the transcript (notation reads: “Grade of F assigned for academic dishonesty”), and/or suspension or expulsion from the university. For information

on the various types of academic dishonesty please refer to the [Academic Integrity Policy](#).

The following illustrates only three forms of academic dishonesty:

- plagiarism, e.g. the submission of work that is not one's own or for which other credit has been obtained.
- improper collaboration in group work.
- copying or using unauthorized aids in tests and examinations.

Authenticity / Plagiarism

Some courses may use a web-based service (Turnitin.com) to reveal authenticity and ownership of student submitted work. For courses using such software, students will be expected to submit their work electronically either directly to Turnitin.com or via an online learning platform (e.g. Avenue to Learn, etc.) using plagiarism detection (a service supported by Turnitin.com) so it can be checked for academic dishonesty.

Students who do not wish their work to be submitted through the plagiarism detection software must inform the Instructor before the assignment is due. No penalty will be assigned to a student who does not submit work to the plagiarism detection software. **All submitted work is subject to normal verification that standards of academic integrity have been upheld** (e.g., on-line search, other software, etc.). For more details about McMaster's use of Turnitin.com please go to www.mcmaster.ca/academicintegrity.

Courses with an On-line Element

Some courses may use on-line elements (e.g. e-mail, Avenue to Learn, LearnLink, web pages, capa, Moodle, ThinkingCap, etc.). Students should be aware that, when they access the electronic components of a course using these elements, private information such as first and last names, user names for the McMaster e-mail accounts, and program affiliation may become apparent to all other students in the same course. The available information is dependent on the technology used. Continuation in a course that uses on-line elements will be deemed consent to this

disclosure. If you have any questions or concerns about such disclosure please discuss this with the course instructor.

Online Proctoring

Some courses may use online proctoring software for tests and exams. This software may require students to turn on their video camera, present identification, monitor and record their computer activities, and/or lock/restrict their browser or other applications/software during tests or exams. This software may be required to be installed before the test/exam begins.

Conduct Expectations

As a McMaster student, you have the right to experience, and the responsibility to demonstrate, respectful and dignified interactions within all of our living, learning and working communities. These expectations are described in the [Code of Student Rights & Responsibilities](#) (the “Code”). All students share the responsibility of maintaining a positive environment for the academic and personal growth of all McMaster community members, **whether in person or online.**

It is essential that students be mindful of their interactions online, as the Code remains in effect in virtual learning environments. The Code applies to any interactions that adversely affect, disrupt, or interfere with reasonable participation in University activities. Student disruptions or behaviours that interfere with university functions on online platforms (e.g. use of Avenue 2 Learn, WebEx or Zoom for delivery), will be taken very seriously and will be investigated. Outcomes may include restriction or removal of the involved students’ access to these platforms.

Academic Accommodation of Students with Disabilities

Students with disabilities who require academic accommodation must contact [Student Accessibility Services](#) (SAS) at 905-525-9140 ext. 28652 or sas@mcmaster.ca to make arrangements with a Program Coordinator. For further

information, consult McMaster University's [Academic Accommodation of Students with Disabilities](#) policy.

Requests for Relief for Missed Academic Term Work

In the event of an absence for medical or other reasons, students should review and follow the [Policy on Requests for Relief for Missed Academic Term Work](#).

Academic Accommodation for Religious, Indigenous, or Spiritual Observances (RISO)

Students requiring academic accommodation based on religious, Indigenous or spiritual observances should follow the procedures set out in the [RISO](#) policy. Students should submit their request to their Faculty Office ***normally within 10 working days*** of the beginning of term in which they anticipate a need for accommodation or to the Registrar's Office prior to their examinations. Students should also contact their instructors as soon as possible to make alternative arrangements for classes, assignments, and tests.

Copyright and Recording

Students are advised that lectures, demonstrations, performances, and any other course material provided by an instructor include copyright protected works. The Copyright Act and copyright law protect every original literary, dramatic, musical and artistic work, **including lectures** by University instructors.

The recording of lectures, tutorials, or other methods of instruction may occur during a course. Recording may be done by either the instructor for the purpose of authorized distribution, or by a student for the purpose of personal study. Students should be aware that their voice and/or image may be recorded by others during the class. Please speak with the instructor if this is a concern for you.

Extreme Circumstances

The University reserves the right to change the dates and deadlines for any or all courses in extreme circumstances (e.g., severe weather, labour disruptions, etc.). Changes will be communicated through regular McMaster communication channels, such as McMaster Daily News, Avenue to Learn and/or McMaster email.
