Office: ABB C521

Office Hours:

By appointment

MSAF SUBMISSION

Email: 1a24msaf@mcmaster.ca

Office Hours:

Students MUST use this email address for submission of the MSAF.

Course Information

ISCI 1A24 is a 24-credit course open only to students registered in the Honours Integrated Science.

The course aims to:

1. Provide you with a wide-ranging background of core concepts in the areas of mathematics, physics, chemistry, life science, Earth science, and science literacy, appropriate to the continuation of study in those areas in level two courses
2. Illustrate the interconnectedness of the scientific disciplines, drawing on examples from topics of current public interest
3. Equip you with a wide range of scientific, problem-solving, critical thinking, and collaborative skills
4. Nurture a creative, student-oriented, distinctive learning environment in which you can begin to develop your academic identities, scientific interests, research, and professional development skills within our community of students, staff, and faculty

Prerequisite(s): Prerequisite(s): Registration in Honours Integrated Science I

Co-requisite(s): BIOSAFE 1BS0 (or HTHSCI 1BS0), WHMIS 1A00 if not already completed. Both requirements must be completed prior to the first lab.

Course Dates: 01/04/2027 - 04/07/2027

Units:12.001

Course Delivery Mode: In Person

Course Description: Integrates learning of essential knowledge and skills from the fundamental scientific disciplines (biology, chemistry, mathematics, physics, Earth science and psychology) in the context of pertinent topics and projects.

Interdisciplinary teams of instructors will teach and linkages between discipline areas will be emphasized partly through study of 'thematic modules'. One mandatory one-day field trip will be held. Integrated lectures, labs, tutorials, field trips, discussions; two terms
Prerequisite(s): Registration in Honours Integrated Science I
Co-requisite(s): BIOSAFE 1BS0 (or HTHSCI 1BS0), WHMIS 1A00 if not already completed. Both requirements must be completed prior to the first lab.

Avenue to Learn: <http://avenue.mcmaster.ca/>

MS Teams: ISCI 1A24. The McMaster Teams portal is <https://teams.microsoft.com/>

Instructor-Specific Course Information

Communication Between Students and The Instructional Team

Any e-mail addressed to faculty must have a brief, relevant subject line, must come from a mcmaster.ca e-mail account and must copy in all relevant parties (e.g., other markers, other group members). All e-mail addressed to students will be sent to their mcmaster.ca e-mail account.

All assignments must be handed in via Avenue or (if specified) in Teams or Crowdmark, in the specified file format (usually pdf). Author(s) name(s) and group designations, if applicable, must be clearly marked on the first page of the work handed in. Submitted files must be named in a way to easily identify the assignment and the author and/or group designation.

Work that is late, handed in to the wrong person, inadequately identified, or in the wrong format, risks losing marks.

Instructors will endeavour to return marked materials within two weeks of hand-in.

Inclusivity

The university values integrity, inclusiveness, and teamwork, and strives to support the personal and collective growth of the McMaster student community. These values are foundational to ensuring campus environments – both in-person and virtual – are conducive to personal wellbeing and academic success. Students are invited to speak with the instructor immediately if they encounter any challenges related to accessing or using the technological requirements expected for successful participation in this course.

Additional Copyright Information

In this course students will have access to material that is subject to copyright laws. This includes (but is not limited to) textbooks and all resources developed by the instructors such as lab manuals, demonstration videos, quizzes, assignments, tests, class notes and class slides.

Students are not allowed to share or redistribute this material in any printed or electronic form without the explicit written consent of the copyright holder. This includes posting any course material on Internet bulletin boards, course repositories, social networks, etc.

Student Responsibilities

To get the most out of the course, you must be prepared to:

1. Attend all sessions, make up all missed work, and provide documentation for authorized absences
2. Interact frequently with faculty, students, TAs, and other support staff
3. Plan and manage your own time
4. Complete preparatory tasks (such as reading, writing assignments, and initial research) in advance of sessions
5. Develop and use reflective learning skills (for example identifying learning objectives, planning and carrying out research tasks, acting on academic feedback)
6. Work as an effective, efficient, and responsive team member on group assignments
7. Follow all the guidelines as outlined in the course instructional documents and manuals

8. Check the course Avenue to Learn site, and your McMaster and Avenue e-mail daily for updates
9. Follow all university policies and guidelines, and in all ways be a responsible university member

Meeting Details

Integrated Concept Seminars (iConS): Mon 9:30-10:20, 11:30-14:20, 16:30-18:20; Tue 9:30-11:20, 12:30-13:20, 14:30-16:20; Thurs 9:30-11:20, 12:30-14:20, 16:30-18:20

Invited Speaker Seminar (ISS): Tue 17:30-18:20

Labs: Wednesdays 08:30-11:20 or 11:30-14:20 or 14:30-17:20; Friday 08:30-11:20 or 11:30-14:20 or 14:30-17:20

Note, research project (RP) presentations will be scheduled in the Friday 11:30-17:20 time slot.

Tutorials: usually held within iConS timeslots. May be scheduled in association with Office Hours.

Class Activities

The weekly course schedule will be posted on Avenue. The course schedule (an Outlook calendar) on Avenue will supersede all other calendars including MOSAIC. Any changes will be announced on Avenue.

Check the course Team and Avenue shell daily.

You must be prepared to be present at all the times indicated for iSci classes, including iConS, Invited Speaker Seminars & labs.

Course Learning Outcomes

- Throughout the course, you will be developing a range of skills including: research skills, teamwork, leadership, communication skills, fieldwork skills, information literacy, experimental design, critical thinking, data analysis, numeracy, and math literacy.
- Physics: The physics portion of ISCI 1A24 covers Newtonian mechanics including Newton's laws of motion, gravity, conservation laws, fluids, and electricity and magnetism. You should be able to bring your knowledge and acquired skills in physics to bear on interdisciplinary problems.
- Mathematics: The math portion of ISCI 1A24 is designed to develop a conceptual understanding of the fundamental principles of calculus and explore their relevance to other branches of natural sciences. It covers standard topics in Calculus I & II: differential and integral calculus of functions of one variable, differential calculus of functions of several variables, sequences and infinite series; as well as polar coordinates and parametric curves, and an introduction to differential equations. Emphasis is placed both on the theoretical foundation and the practical integration of these mathematical concepts and principles with knowledge and skills from biology, chemistry, physics, earth science and psychology in the context of four major interdisciplinary research projects: RP1/2/3/4.
- Chemistry: The objectives for chemistry in ISCI 1A24 are to discuss and understand chemical concepts, theories and examples of fundamental chemistry. You will develop skills needed to solve chemical problems and gain experience in the experiment-driven investigation of chemical questions. You will apply chemical concepts to current issues within the themes of health, energy, the environment and chemical biology, and demonstrate how your chemistry skills can be used to undertake interdisciplinary problems.
- Life Science (LifeSci): The goal of the life science component of ISCI 1A24 is to generate understanding in how the scientific process pertains to our knowledge of biological systems. You will develop conceptual understanding of biology and some psychology through discussion of theory and hands-on laboratory practice. After completion of ISCI 1A24, you will begin to understand the evolution of biological concepts spanning cellular to ecosystem level perspectives and apply synthesis across scientific disciplines to address questions relevant to society.
- Earth Science (EarthSci): The Earth science portion of ISCI 1A24 will provide an introduction to the many dynamic geological and geomorphological processes that shape the Earth and its surface and subsurface environments. These processes will be discussed using both local and global applications.

You will be required to participate in a mandatory field trip for this component of ISCI 1A24.

- Science Literacy (SciLit): The science literacy portion of ISCI 1A24 will introduce students to oral and written forms used to communicate science to scientists and non-scientists. Through weekly exercises, students will develop the ability to organize, compute and convey scientific data and concepts clearly and concisely. Students will also become familiar with a variety of information sources, and how to find and use that information effectively.

Required Materials and Texts

Please sign in with your MacID [here](#) to view your booklist

Math - PKG Calculus: Early Transcendentals W/ Single & Multivariable Solutions Manuals. Author: Stewart, Edition: 9, Publisher: Cengage Learning Canada Inc.

\$182.95

Physics - ETEXT Physics for Scientists and Engineers: A Strategic Approach with Modern Physics W/ Modified Mastering Physics 24 Month Access. Author: Knight, Edition 5, Publisher: Pearson Education Canada

\$119.95

\$97.95

Earth Science alternate - NOTE: Any introductory Earth science textbook can be used to aid conceptual understanding.

Class Format

In Person

There will be twenty-four hours of supervised time per week (not including some field trips and exams). Attendance is mandatory for all supervised time. During the first six weeks of the course, the focus will be on background concepts and basic skills. For the rest of the course, most activities will be directly related to Research Project work. The types of activities are:

iConS: (Integrated Concept Seminars): Class activities led by an instructional team member. These will focus on core disciplinary knowledge, scientific techniques and interdisciplinary topics. They will usually contain activities and discussion. Your understanding of content presented in iConS will be assessed via exams, continuous assessment, and/or project work.

Project iConS: When working on Research Projects, progress will be monitored and guided during these sessions. Faculty will often be available for “Q&A” sessions.

SciLit (Science Literacy): The focus during the weekly SciLit activities will be developing research, data and coding skills, and communication skills needed for current and future course work.

Labs: Each week, approximately six hours are allocated to laboratory activities, which can include lab-based experiments, field excursions, or research project labs.

Workshops: An activity or exercise that you do in any discipline area that does not appear in the lab manual and does not involve lab notes. Workshops may include in class work on computers or problem sets. There may be assignments associated with workshops.

Invited Speaker Seminars: During the Research Projects, speakers will be invited to widen your understanding of key issues. At other times, the one-hour Invited Speaker Seminar slot will be used for review periods and additional class activities.

Office Hours: Instructors and Teaching Assistants will hold office hours and communicate via Avenue and/or Teams when and where these take place.

Course Evaluation

ISCI 1A24 will be assessed across six components (mathematics, physics, chemistry, life science, Earth science, and science literacy) through three formats: exams, continuous assessment, and research projects.

Mid-term and final exams will assess your core knowledge with discipline-specific content containing questions similar to other level one course exams. Note: as this is a full-year course, exams in the December exam period are still considered mid-term exams.

Discipline-specific continuous assessments include laboratory work, preparatory tasks, general “homework” and quizzes. Work will be graded with a combination of individual and group assignments.

Research Projects (RPs) contain varied assessed deliverables, demonstrating scientific skills, additional research, collaborative authorship, project management, peer review, and communication skills. Most work will be compiled and graded as group work.

This course is worth 24 credits. The table below shows how the ISCI 1A24 course mark will be assembled.

		Activity			
		Exams	Continuous	Projects	Total
		Discipline Exams/Quizzes	Activities & weights at instructor's discretion	RP1-4	
C O M P O N E N T	Math	32	20	28	80
	Physics	30	22	28	80
	Chemistry	32	20	28	80
	Life Science	30	22	28	80
	Earth Science	10	12	18	40
	Science Literacy	0	20	20	40
	TOTAL	134	116	150	400

Pass-Fail Criteria by Component

Passing ISCI 1A24 requires attaining a grade of 50% or higher in the course as a whole. Passing ISCI 1A24 also requires passing all components as described below.

Mathematics

A student will pass the math component of ISCI 1A24 only if they satisfy all the following criteria:

- Gains at least 16 points (out of 32 available) in the exam element of the math component
- Gains at least 40 points (out of 80 available) in the component overall

Physics

A student will pass the physics component of ISCI 1A24 only if they satisfy all the following criteria

- Gains at least 15 points (out of 30 available) in the exam element of the physics component
- Gains at least 40 points (out of 80 available) in the component overall
- Attends and completes the core physics laboratories

Chemistry

A student will pass the chemistry component of ISCI 1A24 only if they satisfy all the following criteria:

- Gains at least 16 points (out of 32 available) in the exam element of the chemistry component
- Gains at least 40 points (out of 80 available) in the component overall
- Attends and completes the core chemistry laboratories

Life Science

A student will pass the life science component of ISCI 1A24 only if they satisfy all the following criteria:

- Gains at least 15 points (out of 30 available) in the exam element of the life science component
- Gains at least 40 points (out of 80 available) in the component overall
- Attends and completes the core life science laboratories

Earth Science

A student will pass the Earth science component of ISCI 1A24 only if they satisfy all the following criteria:

- Gains at least 5 points (out of 10 available) in the exam element of the Earth science component

- Gains at least 20 points (out of 40 available) in the component overall
- Attends and completes the core Earth science laboratories

Science Literacy

A student will pass the science literacy component of ISCI 1A24 only if they satisfy all the following criteria:

- Gains at least 20 points (out of 40 available) in the component

There may be opportunities to make up failed component content over the summer by enrolling in specified courses (unit value may be higher than the iSci component). It will be left to the discretion of the instructors and iSci Program Coordinator to determine the content that needs to be made up. **If you fail more than 2 components of ISCI 1A24, you will not be permitted to enroll in ISCI 2A18 (no make up will be possible).**

Undergraduate Grading Scale

The grades breakdown for McMaster's 12-Point Grading Scale

Grade	Equivalent Grade Point	Equivalent Percentages
A+	12	90-100
A	11	85-89
A-	10	80-84
B+	9	77-79
B	8	73-76
B-	7	70-72
C+	6	67-69
C	5	63-66
C-	4	60-62
D+	3	57-59
D	2	53-56
D-	1	50-52
F	0	0-49

Course Schedule

Dates	Activities
-------	------------

September 8 – October 9	Foundations (Basic Training)
October 12 – 16	Mid-term Recess
October 19 - 23	Mid-term Exam Week
October 26 – November 13	RP1: Planetary Exploration
November 16 – December 4	RP2: Drugs, Doses and Biodistribution
December 7 – 10	Review
December 11 – 23	Mid-year Exams
January 4 – February 12	RP3: Sustainable Energy in Challenging Environments
February 15 – 19	Mid-term Recess
February 22 - 26	Mid-term Exam Week
March 1 – April 2	RP4: Intro to Cancer Science
April 5 – 7	Review
April 9 – 22	Final Exams

Laboratory Overview, Operation, and Safety

Laboratory Component – all available at The Campus Store

- Lab Coat
- Safety Goggles
- Permanent marker (for lab activities)
- Field notebook, orange, 8x4 (ELAN)

Note – A lab coat is required for ISCI 1A24 and ISCI 2A18 and may be required for courses that you may take in Level III and Level IV. That said, you may not always need your lab coat. For that reason, **ReCoat partners with the McMaster community to keep lab coats in the lab and not the landfill.** Instead of tossing used lab coats in the garbage or the back of a closet, ReCoat promotes our circular economy by collecting lightly used lab coats and redistributing them to students. To join our circular economy, take the [ReCoat Sustainability pledge](#) and pledge to donate your lab coat when you are finished with it.

Mandatory Safety Training

Before entering the laboratories, you must complete two mandatory laboratory safety courses. These courses can be accessed via Avenue.

- WHMIS 1A00
- BIOSAFE 1BS0

Turnitin.com

Some courses may use a web-based service (Turnitin.com) to reveal authenticity and ownership of student submitted work. For courses using such software, students will be expected to submit their work electronically either directly to Turnitin.com or via an online learning platform (e.g. A2L, etc.) using plagiarism detection (a service supported by Turnitin.com) so it can be checked for academic dishonesty.

Students who do not wish their work to be submitted through the plagiarism detection software must inform the Instructor before the assignment is due. No penalty will be assigned to a student who does not submit work to the plagiarism detection software. All submitted work is subject to normal verification that standards of academic integrity have been upheld (e.g., on-line search, other software, etc.). For more details about McMaster's use of Turnitin.com please go to www.mcmaster.ca/academicintegrity.

Generative AI: Some Use Permitted

Some instructors may allow students to use generative AI in this course on specific occasions in accordance with the guidelines outlined for each assessment or activity, so long as the use of generative AI is referenced and cited. A McMaster specific citation guide is found on the [MacPherson Institute website](#). Further information about the appropriate use, risks and guidelines regarding AI can be found on the [Office of the Provost's website](#).

Use of generative AI outside occasions specified by instructors or without citation constitutes academic dishonesty. It is the student's responsibility to be clear on the limitations for use for each assessment and to be clear on the expectations for citation and reference and to do so appropriately.

In alignment with [McMaster academic integrity policy](#), it “shall be an offence knowingly to ... submit academic work for assessment that was purchased or acquired from another source”. This includes work created by generative AI tools. Also stated in the policy is the following, “Contract Cheating is the act of “outsourcing of student work to third parties” (Lancaster & Clarke, 2016, p. 639) with or without payment.” Using Generative AI tools is a form of contract cheating. Charges of academic dishonesty will be brought forward to the Office of Academic Integrity.

Course Specific Relief for Missed Academic Work Information

[McMaster Student Absence Form \(MSAF\)](#): In the event of an absence for medical or other reasons, students should review and follow the Academic Regulation in the Undergraduate Calendar “Requests for Relief for Missed Academic Term Work”.

Policy Regarding Missed Work

Requests for missed academic work worth less than 25% of the final grade resulting from personal or medical situations, lasting up to 3 calendar days, can be reported, once per term, without documentation, using the McMaster Student Absence Form (MSAF). Relief for missed work for a longer duration or for other reasons must be reported to your Faculty office, and relief from term work may not necessarily be granted.

When using the MSAF, you MUST use 1a24msaf@mcmaster.ca as the contact e-mail for your ISCI 1A24 work.

You MUST ALSO contact the relevant component lead or laboratory coordinator (depending on what you missed) within 48 hours by email.

If you do not, your MSAF may not be granted.

Please refer to the contact list on the first page of this outline for appropriate email addresses. Your component lead or laboratory coordinator will indicate what relief **may be granted** for the work you have missed, and relevant details such as revised deadlines, or time and location of a make-up exam/quiz/test.

An MSAF is a request for *individual* consideration: understand that an instructor may respond with an *individual* solution.

Please note that the MSAF may not be used for final project deliverables, deliverables worth more than 25% of the final grade, nor can it be used for a final examination or its equivalent.

Please [review and follow the Academic Regulation in the Undergraduate Calendar under “Requests for Relief for Missed Academic Term Work” here.](#)

Absence from iConS, Tutorials, or Workshops

If you are absent from any scheduled ISCI 1A24 session, it is your responsibility to make up missed work. If you are absent from a scheduled ISCI 1A24 session that has an associated piece of assessment (e.g., test, quiz, presentation, etc.) without authorization your mark will be recorded as 0 (see procedure for authorized absence above).

Absence from Invited Speaker Seminars

Unless approval for missing an Invited Speaker Seminar is obtained (see procedure for authorized absence above) **your project mark**, associated with the Invited Speaker Seminar, could be **reduced by 20%**. Attendance will be taken at all Invited Speaker Seminars.

Absence from Laboratory

Students unable to attend a laboratory due to illness or other personal situation should complete a McMaster Student Absence Form (MSAF). Please refer to procedure for authorized absence above. As a consequence of the full lab schedule in iSci, making up missed labs is not likely to occur. Every effort to provide accommodation to ensure that key learning outcomes are met will be undertaken.

1. If a lab is missed with a MSAF submission, the mark for that lab will be redistributed as appropriate or an accommodation will be provided, if possible, at the discretion of the lab Coordinator.
2. Any unauthorized absences (i.e., no MSAF submission) will result in a mark of 0 for that lab. Any unauthorized absences from project labs will result in a 50% reduction of the total project mark.
3. If more than 2 labs PER DISCIPLINE PER YEAR are missed, irrespective of MSAF submission, the student will fail that core component of ISCI 1A24 AND THUS FAIL THE ENTIRE COURSE.
4. If more than 3 labs per term are missed, irrespective of MSAF submission, the student will FAIL THE ENTIRE COURSE.

Missed Deadlines

Any late submissions will result in a penalty of **20% per day unless** faculty members are notified of any problems **in advance AND approve** of a late submission. It is left to the discretion of the Instructors to determine if accommodations will be made. This holds for both group and individual assignments.

Missed Exams and Other Assessment Activities

Exams or other assessment activities missed for reasons of unauthorized absence will be graded as zero. Authorized absence will result in rescheduled exams or compensation from other assessment activities.

Checking Grades & Regrade Policy

Checking Your Grades

Your marks will be recorded on Avenue. It is your responsibility to check that all grades entered into Avenue are recorded properly. You must notify your component leaders and laboratory coordinator about any errors with regard to how your mark was entered. You have until 48 hours prior to the final exam to discuss any Avenue mark issues.

The SIS Policy for viewing and requesting a formal review of final exams is used in iSci. It is available [here](#).

Regrade Policy

You will have **one week** from the date that an assignment (or test or mid-term exam) is returned to you **to appeal your mark**. If you wish to appeal a grade, you must submit to the component lead (or laboratory coordinator for labs) a written note justifying why you wish to have the assignment remarked, with the assignment attached. If your component lead or laboratory coordinator considers the written justification to be insufficient (e.g., simply wanting a higher grade is insufficient), the assignment will not be re-graded. If the justification is considered sufficient, the entire assignment will be re-graded. You must therefore understand that your mark can increase or decrease.

APPROVED ADVISORY STATEMENTS

Academic Integrity

You are expected to exhibit honesty and use ethical behaviour in all aspects of the learning process. Academic credentials you earn are rooted in principles of honesty and academic integrity. **It is your responsibility to understand what constitutes academic dishonesty.**

Academic dishonesty is to knowingly act or fail to act in a way that results or could result in unearned academic credit or advantage. This behaviour can result in serious consequences, e.g. the grade of zero on an assignment, loss of credit with a notation on the transcript (notation reads: "Grade of F assigned for academic dishonesty"), and/or suspension or expulsion from the university. For information on the various types of academic dishonesty please refer to the [Academic Integrity Policy](#).

The following illustrates only three forms of academic dishonesty:

- plagiarism, e.g. the submission of work that is not one's own or for which other credit has been obtained.
- improper collaboration in group work.
- copying or using unauthorized aids in tests and examinations.

Authenticity / Plagiarism

Some courses may use a web-based service (Turnitin.com) to reveal authenticity and ownership of student submitted work. For courses using such software, students will be expected to submit their work electronically either directly to Turnitin.com or via an online learning platform (e.g. Avenue to Learn, etc.) using plagiarism detection (a service supported by Turnitin.com) so it can be checked for academic dishonesty.

Students who do not wish their work to be submitted through the plagiarism detection software must inform the Instructor before the assignment is due. No penalty will be assigned to a student who does not submit work to the plagiarism detection software. **All submitted work is subject to normal verification that**

standards of academic integrity have been upheld (e.g., on-line search, other software, etc.). For more details about McMaster's use of Turnitin.com please go to www.mcmaster.ca/academicintegrity.

Courses with an On-line Element

Some courses may use on-line elements (e.g. e-mail, Avenue to Learn, LearnLink, web pages, capa, Moodle, ThinkingCap, etc.). Students should be aware that, when they access the electronic components of a course using these elements, private information such as first and last names, user names for the McMaster e-mail accounts, and program affiliation may become apparent to all other students in the same course. The available information is dependent on the technology used. Continuation in a course that uses on-line elements will be deemed consent to this disclosure. If you have any questions or concerns about such disclosure please discuss this with the course instructor.

Online Proctoring

Some courses may use online proctoring software for tests and exams. This software may require students to turn on their video camera, present identification, monitor and record their computer activities, and/or lock/restrict their browser or other applications/software during tests or exams. This software may be required to be installed before the test/exam begins.

Conduct Expectations

As a McMaster student, you have the right to experience, and the responsibility to demonstrate, respectful and dignified interactions within all of our living, learning and working communities. These expectations are described in the [Code of Student Rights & Responsibilities](#) (the "Code"). All students share the responsibility of maintaining a positive environment for the academic and personal growth of all McMaster community members, **whether in person or online**.

It is essential that students be mindful of their interactions online, as the Code remains in effect in virtual learning environments. The Code applies to any interactions that adversely affect, disrupt, or interfere with reasonable participation in University activities. Student disruptions or behaviours that interfere with university functions on online platforms (e.g. use of Avenue 2 Learn, WebEx or Zoom for delivery), will be taken very seriously and will be investigated. Outcomes may include restriction or removal of the involved students' access to these platforms.

Academic Accommodation of Students with Disabilities

Students with disabilities who require academic accommodation must contact [Student Accessibility Services](#) (SAS) at 905-525-9140 ext. 28652 or sas@mcmaster.ca to make arrangements with a Program Coordinator. For further information, consult McMaster University's [Academic Accommodation of Students with Disabilities](#) policy.

Requests for Relief for Missed Academic Term Work

In the event of an absence for medical or other reasons, students should review and follow the [Policy on Requests for Relief for Missed Academic Term Work](#).

Academic Accommodation for Religious, Indigenous, or Spiritual Observances (RISO)

Students requiring academic accommodation based on religious, Indigenous or spiritual observances should follow the procedures set out in the [RISO](#) policy. Students should submit their request to their Faculty Office ***normally within 10 working days*** of the beginning of term in which they anticipate a need for accommodation or to the Registrar's Office prior to their examinations. Students should also contact their instructors as soon as possible to make alternative arrangements for classes, assignments, and tests.

Copyright and Recording

Students are advised that lectures, demonstrations, performances, and any other course material provided by an instructor include copyright protected works. The Copyright Act and copyright law protect every original literary, dramatic, musical and artistic work, **including lectures** by University instructors.

The recording of lectures, tutorials, or other methods of instruction may occur during a course. Recording may be done by either the instructor for the purpose of authorized distribution, or by a student for the purpose of personal study. Students should be aware that their voice and/or image may be recorded by others during the class. Please speak with the instructor if this is a concern for you.

Extreme Circumstances

The University reserves the right to change the dates and deadlines for any or all courses in extreme circumstances (e.g., severe weather, labour disruptions, etc.). Changes will be communicated through regular McMaster communication channels, such as McMaster Daily News, Avenue to Learn and/or McMaster email.
