Course Information

Lectures: In-Person - Wed 2:30-3:20pm and 3 weekly online modules

Labs: 2 hours biweekly

Tests: Online weekly quizzes during Friday "Tutorial" slot and in-person midterm
Feb 26 7-9pm

Course Dates: 01/04/2027 - 04/07/2027

Units: 3.00

Course Delivery Mode: Blended - online modules & in-person class/labs Blended
(In-Person/Online)

Course Description: An examination of the anatomy and physiology of the cardiovascular, respiratory, digestive, renal, endocrine and reproductive systems. Lecture (one hour), online modules (three hours), lab (two hours, alternating weeks); one term Prerequisite(s): KINESIOL 1A03; and registration in Level I Honours Kinesiology Co-requisite(s): WHMIS 1A00 if not already completed, this requirement must be completed prior to the first lab. Laboratory Routine Practices, a mandatory online health and safety module, available through Mosaic, must be completed prior to the first lab. Antirequisite(s): HTHSCI 1D06 A/B, 1H06 A/B, 2F03, 2FF3, 2L03, 2LL3, KINESIOL 1YY3, 2XX3, 2YY3

Equity, Diversity, and Inclusion Statement

The instructor and support team for this course are committed to creating an inclusive classroom and laboratory environment that supports students of all backgrounds, abilities, and beliefs. If at any time during this course you feel we could do more to improve our efforts, please do not hesitate to reach out to us. We also want to acknowledge that the anatomical and medical knowledge we cover may have been acquired by research that was historically obtained through unethical, racist, or sexist methods. While the focus of this course is not the history of medicine, we are committed to including diversity in the presentation of course materials and examples.

Instructor-Specific Course Information

Email Policy

- Only emails sent from McMaster accounts that the instructional team deem to be respectful and professional will be addressed.
- Please include course code in the subject of your email
- Please include your full name and student number in the email
- Emails inquiring about the Friday quiz sent before the following Monday at 8:00am will be deleted. This is to encourage students to try and figure out

their errors on their own. We feel this is a valuable exercise. If you still have a concern or are confused about a concept, we will happily reply to emails sent after 8:00am on Monday.

Use Of Course Materials

Course materials provided by the instructor are for use by students registered in this class only. Under no circumstances are these materials to be shared, posted or sold to a third party without permission from the instructor. This includes, but not limited to, online posting of lecture/lab notes, online lectures, recordings of lectures, or any lab materials on a website other than the Avenue site designed for the course.

Specific policy for Lab Images: Images provided to students containing materials from the laboratories are for personal use only and should be treated as confidential based on the Anatomy Act of Ontario. Images are posted by instructors on the Avenue to Learn course shell. Any posting of these images by students to other websites is strictly prohibited and is considered an academic integrity violation. If images are printed or saved onto a personal computer for study purposes, they are to be kept in a confidential location and deleted at the end of the term.

Course Learning Outcomes

- 1. The three functional components of the cardiovascular system (blood, heart, blood vessels) and how they operate in unison for form a functional system.
- 2. The role of the respiratory system in maintaining acid-base balance and overall physiological homeostasis.

- 3. The neuromuscular control of human ventilation as well as the intrinsic/extrinsic factors regulating breathing.
- 4. The basic functions of the lymphatic system and the anatomy of lymphatic circulation, organs and tissues.
- 5. The structure and function of the human digestive system in the process of breaking down and absorbing macro- and micro-nutrients.
- 6. The role that the human kidney plays in maintaining blood homeostasis, and the mechanisms involved with the production of concentrated or dilute urine.
- 7. The major organs, and their secretions, of the human endocrine system, as well as the general characteristics and effects of the major hormones secreted in the human body.
- 8. The structure and function of the human reproductive system, including the process of spermiogenesis.
- 9. The normal periodic structural/physiological changes that occur to the female reproductive system during the menstrual cycle, as influenced by hormonal secretions.

Course Learning Goals

- Personal organization and time management in order to multi-task, set priorities, and allocate time effectively to meet deadlines such as tests/quizzes, prelab quizzes, exams, and lecture/lab attendance.
- Professional interaction and communication via email, online forums, and face to face meetings with professors, staff, teaching assistants, and peers.
- Critical and integrative thinking skills as students research and answer questions based on anatomical systems-based case studies.
- Teamwork and interpersonal skills by participation in small group laboratory exercises and/or initiating participation on discussion boards.
- Displaying appropriate and respectful behaviour towards the human anatomy laboratory, individuals who have donated their bodies to science, and instructors, staff, teaching assistants, and peers.
- Reading relevant texts and course materials and demonstrating comprehension by completing in-class activities, online lecture modules, weekly quizzes, midterm tests, prelab quizzes, and final exam.

Required Materials and Texts

Please sign in with your MacID [here](#) to view your booklist

Seeley's Anatomy and Physiology

ISBN: 9781265129583

Authors: VanPutte, Regan, and Russo

Publisher: McGraw Hill

Edition: 13th

Print and Digital version: Seelys Anatomy & Physiology w/ Connect 2 Year Access - \$166.95

Digital only version: Etext Seelys Anatomy & Physiology w/ Connect 540 Day Access - \$119.95

Lab Manual: Introduction to Anatomy and Physiology I

Spiral bound notebook - \$28.57

Lab Coat

Campus Store Price: \$29.99

Any lab coat is fine though.

Class Format

Blended (In-Person/Online)

General Course Structure

This course has 3 online asynchronous lecture modules delivered weekly with one in-class lecture that supports and expands the knowledge learned in the online modules. In-class lectures will not be streamed live, but will be recorded and posted later. There are also 5 bi-weekly 2-hr labs throughout the term.

Virtual Course Component Delivery

To follow and participate in virtual class components (like quizzes and virtual office hours) it is expected that you have reliable access to the following:

- A computer that meets performance requirements found [here](#).
- An internet connection that is fast enough to stream video.

- Computer accessories that enable class participation, such as a microphone, speakers and webcam when needed.

If you think that you will not be able to meet these requirements, please contact uts@mcmaster.ca as soon as you can. Please visit the Technology Resources for Students page for detailed requirements. If you use assistive technology or believe that our platforms might be a barrier to participating, please contact Student Accessibility Services, sas@mcmaster.ca, for support.

Course Evaluation

PLEASE NOTE: This is a draft version of the course evaluation breakdown and may change before the start of term.

Course Assessments

Assessment	Weight
Weekly Quizzes (online):	10% (10 quizzes X 1 %)
Prelab Quizzes:	5% (5 quizzes x 1%)
In-class Assessments/Participation:	5%
Midterm Test (in-person):	35% Friday Feb 26 - 7-9pm (Covering lecture/case study content)
Final Exam (in-person):	45% (Covering lecture/case study content post midterm and all lab content for the term)

Course Evaluation Details

Weekly Quizzes

Weekly quizzes will be online in Avenue and will take place on Fridays between 11:30am and 1:20pm. This time covers all of the “T” slots on your schedule (see MOSAIC for your T01-T02 slot). You will have the option to start your quiz anytime between 11:30am and 1pm on testing days (SAS students should start earlier to ensure their full time is completed before the 1:20 pm deadline). All students were required to register for a “tutorial” slot, so you can choose to write during your scheduled time, or any other time during the window. Quizzes will be 20 mins in length and consist of a mix of fill-in-the-blank, multiple choice and matching questions for a total of 15 marks per test (spelling counts). Ten quizzes are

scheduled for the term. More details will be posted on Avenue at the start of term. If you need an accommodation to write an in-person quiz instead, you can email kinap@mcmaster.ca to discuss options with Adrienne.

Friday Quiz Rules

- You are not allowed to use notes or any other content assistance during the quiz.
- You are not allowed to copy quiz questions for any reason at any time, during or after the quiz.
- If you have an issue with the content of a question, email kinap@mcmaster.ca after 8:00am the Monday following the quiz and we will review it.
- All of McMaster's Academic Integrity policies apply to these quizzes (see policy below).

Pre-Lab Quizzes

Prelab quizzes are released on Avenue at noon the Thursday before your lab week and are due the following Monday at noon (see class schedule). Pre-Lab quizzes are open book, and you will have the 4 full days to complete each one. You can enter the quiz on Avenue, save your answers and return to it as many times as you like within the 4-day window. Once the quiz is submitted, we cannot reopen it, so ensure you are happy with your final answers before submitting. Pre-lab quiz grades are tied to lab attendance. Lab quiz grades will automatically be replaced by a 0% without proof of lab attendance. If you have a valid reason for not attending the lab, please submit an MSAF and your pre-lab quiz mark will be reinstated.

In-class Assessments/Participation

This will be made up of a combination of lecture module completion/participation, in-class assessments and Connect assignments. More details will be posted on Avenue at the start of term.

Midterm Test

The midterm test is scheduled for Friday February 26 7-9pm. The test will be written in-person.

Final Exam

The final exam will be scheduled by the Office of the Registrar and take place during the Exam Period. The final exam will be written in-person.

Undergraduate Grading Scale

The grades breakdown for McMaster's 12-Point Grading Scale

Grade	Equivalent Grade Point	Equivalent Percentages
A+	12	90-100
A	11	85-89
A-	10	80-84
B+	9	77-79
B	8	73-76
B-	7	70-72
C+	6	67-69
C	5	63-66
C-	4	60-62
D+	3	57-59
D	2	53-56
D-	1	50-52
F	0	0-49

Laboratory Safety

WHIMIS 1A00 and Laboratory Routine Practices are required safety courses for KIN 1A03/1Y03/2Y03. It is the responsibility of the student to complete these courses PRIOR TO THE FIRST LAB. WHMIS 1A00 completion is tracked centrally but LABORATORY ROUTINE PRACTICES is tracked by the instructor. The procedure for proving completion of LABORATORY ROUTINE PRACTICES may take ~1 week to complete. Steps are as follows:

1. Go to mosaic.mcmaster.ca and log in
2. Click the three dots on the top right corner of the Mosaic home page
3. Select personalize home page
4. Click "add tile" from the top right corner of your screen
5. Search for "Regulatory Training" and click on it to select
6. Add the tile by pressing "save" from the top right corner
7. Click on the Regulatory Training tile and select "Request Training Enrollment"
8. Search by course name > type **Laboratory Routine Practices**
9. Click "View Available Sessions" then click the link in the session column of the table
10. Ignore the date/time info (the course is online) and select CONTINUE.
11. Scroll to the bottom and select SUBMIT. This "orders" the course and the safety office will manually add you.
12. Wait for it to appear on Avenue (takes 24-48 hrs)
13. Once it appears on Avenue, complete the course successfully by passing the quiz, then wait ~48 hrs and return to MOSAIC to check your training record for completion.
14. To do this, go back to mosaic.mcmaster.ca > Regulatory Training > My Training Summary > take a screen capture of your summary, produce a pdf and upload it to the Assignments drop box in Avenue
15. UPLOADING A BLANK OR OUT OF DATE TRAINING SUMMARY WILL BE CONSIDERED ACADEMIC DISHONESTY (see below for details)

- If you have already completed ROUTINE PRACTICES, you do not need to complete it again. You will still need to upload your MOSAIC Training Summary showing it as complete.
- If you have already completed WHMIS 1A00, you do not need to complete it again.

Laboratory Safety procedures will be reviewed during the first lab of the year. A number of the labs involve the use of human and animal specimens. You are expected to adhere to the laboratory guidelines at all times. Failure to do so will result in removal from the laboratory setting. Several labs will also involve examination of physiological responses on student volunteers. All risks and procedures are outlined in the lab manual, and it is your responsibility to review these prior to attending the lab. **Participation as a volunteer is not mandatory and we will respect your choice not to participate as a subject, but we encourage all students to watch and learn from others whenever possible.**

Turnitin.com

Some courses may use a web-based service (Turnitin.com) to reveal authenticity and ownership of student submitted work. For courses using such software, students will be expected to submit their work electronically either directly to Turnitin.com or via an online learning platform (e.g. A2L, etc.) using plagiarism detection (a service supported by Turnitin.com) so it can be checked for academic dishonesty.

Students who do not wish their work to be submitted through the plagiarism detection software must inform the Instructor before the assignment is due. No penalty will be assigned to a student who does not submit work to the plagiarism detection software. All submitted work is subject to normal verification that standards of academic integrity have been upheld (e.g., on-line search, other software, etc.). For more details about McMaster's use of Turnitin.com please go to www.mcmaster.ca/academicintegrity.

Course Modification

The instructor and university reserve the right to modify elements of the course during the term. The university may change the dates and deadlines for any or all courses in extreme circumstances. If either type of modification becomes

necessary, reasonable notice and communication with the students will be given with explanation and the opportunity to comment on changes. It is the responsibility of the student to check their McMaster email and course websites weekly during the term and to note any changes.

Also, the course instructor will maintain an Avenue to Learn component for the course and students are expected to monitor daily (i.e., check the Avenue to Learn notice board and postings) and be aware of any changes that are made.

Generative AI: Use Prohibited

Students are not permitted to use generative AI in this course. In alignment with [McMaster academic integrity policy](#), it “shall be an offence knowingly to ... submit academic work for assessment that was purchased or acquired from another source”. This includes work created by generative AI tools. Also state in the policy is the following, “Contract Cheating is the act of “outsourcing of student work to third parties” (Lancaster & Clarke, 2016, p. 639) with or without payment.” Using Generative AI tools is a form of contract cheating. Charges of academic dishonesty will be brought forward to the Office of Academic Integrity.

Course Specific Relief for Missed Academic Work Information

Requests for Relief for Missed Academic Term Work

In the event of an absence for medical or other reasons, students should review and follow the [Policy on Requests for Relief for Missed Academic Term Work](#).

Policy Regarding Missed Work

Quizzes/tests, prelab quizzes or labs that are missed for any reason other than an approved medical/legal/religious reason automatically receive a grade of 0. There will be **no make-up tests for the Friday quizzes or prelab quizzes**. If you miss a quiz/test/prelab/lab due to a minor medical or personal reason, lasting up to 3 days, you may report your absence, without documentation, using the McMaster Student Absence Form (as long as the missed work is worth less than 25% of the final course grade). The automated MSAF (MSAF Type A) can only be used once per term. Absences for a longer duration or for other reasons (e.g. religious) must

be reported to the Faculty of Science Associate Dean's office, with documentation, and relief from term work may not necessarily be granted. When using the MSAF, please address it to **kinap@mcmaster.ca**. NOTE: if your situation involves a prolonged absence and numerous missed quizzes/classes/labs, please contact the instructor and Associate Dean's office as soon as possible.

Upon receipt of your MSAF/RISO or approval of your documentation from the Dean's office, the following accommodations will be made:

Missed Friday Quizzes: The value of the missed quiz will be added to the value of your Midterm or Final exam (depending on the content)

Missed Pre-lab Quizzes: The value of the missed prelab quiz will be added to the Final exam

Missed Labs: If you miss a lab and do not have a documented reason for your absence (MSAF/RISO), your prelab quiz score will be changed to zero. It will be the responsibility of the student to get notes from the missed lab. Lab material will be testable on Friday quizzes and the final exam. All students will be provided images from the lab to help prepare for the exam.

Connect Assignments, In-class assessments or Lecture

completion/participation: RISO/MSAF's cannot be submitted for any components linked with participation score as it will be graded on a flexible scale.

Missed Midterm Exam: Students who miss the midterm exam on February 26 must write the make-up exam on **Friday Mar 12 7-9pm**.

Missed Final Exam: Students who miss a Registrar-scheduled final exam can apply to the Associate Dean's office for permission to write in the deferred final exam schedule. In all cases, appropriate documentation must be submitted to the Office of the Associate Dean, Faculty of Science, for consideration of deferred.

Checking Grades & Regrade Policy

Checking Your Grades

Your marks will be recorded on Avenue. It is your responsibility to check that all grades entered into Avenue are recorded properly. All grade concerns and

discrepancies must be reported to the Instructional Assistant within a week of receiving the grade.

APPROVED ADVISORY STATEMENTS

Academic Integrity

You are expected to exhibit honesty and use ethical behaviour in all aspects of the learning process. Academic credentials you earn are rooted in principles of honesty and academic integrity. **It is your responsibility to understand what constitutes academic dishonesty.**

Academic dishonesty is to knowingly act or fail to act in a way that results or could result in unearned academic credit or advantage. This behaviour can result in serious consequences, e.g. the grade of zero on an assignment, loss of credit with a notation on the transcript (notation reads: "Grade of F assigned for academic dishonesty"), and/or suspension or expulsion from the university. For information on the various types of academic dishonesty please refer to the [Academic Integrity Policy](#).

The following illustrates only three forms of academic dishonesty:

- plagiarism, e.g. the submission of work that is not one's own or for which other credit has been obtained.
- improper collaboration in group work.
- copying or using unauthorized aids in tests and examinations.

Authenticity / Plagiarism

Some courses may use a web-based service (Turnitin.com) to reveal authenticity and ownership of student submitted work. For courses using such software, students will be expected to submit their work electronically either directly to Turnitin.com or via an online learning platform (e.g. Avenue to Learn, etc.) using plagiarism detection (a service supported by Turnitin.com) so it can be checked for academic dishonesty.

Students who do not wish their work to be submitted through the plagiarism detection software must inform the Instructor before the assignment is due. No

penalty will be assigned to a student who does not submit work to the plagiarism detection software. **All submitted work is subject to normal verification that standards of academic integrity have been upheld** (e.g., on-line search, other software, etc.). For more details about McMaster's use of Turnitin.com please go to www.mcmaster.ca/academicintegrity.

Courses with an On-line Element

Some courses may use on-line elements (e.g. e-mail, Avenue to Learn, LearnLink, web pages, capa, Moodle, ThinkingCap, etc.). Students should be aware that, when they access the electronic components of a course using these elements, private information such as first and last names, user names for the McMaster e-mail accounts, and program affiliation may become apparent to all other students in the same course. The available information is dependent on the technology used. Continuation in a course that uses on-line elements will be deemed consent to this disclosure. If you have any questions or concerns about such disclosure please discuss this with the course instructor.

Online Proctoring

Some courses may use online proctoring software for tests and exams. This software may require students to turn on their video camera, present identification, monitor and record their computer activities, and/or lock/restrict their browser or other applications/software during tests or exams. This software may be required to be installed before the test/exam begins.

Conduct Expectations

As a McMaster student, you have the right to experience, and the responsibility to demonstrate, respectful and dignified interactions within all of our living, learning and working communities. These expectations are described in the [Code of Student Rights & Responsibilities](#) (the "Code"). All students share the responsibility of maintaining a positive environment for the academic and personal growth of all McMaster community members, **whether in person or online**.

It is essential that students be mindful of their interactions online, as the Code remains in effect in virtual learning environments. The Code applies to any interactions that adversely affect, disrupt, or interfere with reasonable participation in University activities. Student disruptions or behaviours that interfere with university functions on online platforms (e.g. use of Avenue 2 Learn, WebEx or Zoom for delivery), will be taken very seriously and will be investigated. Outcomes may include restriction or removal of the involved students' access to these platforms.

Academic Accommodation of Students with Disabilities

Students with disabilities who require academic accommodation must contact [Student Accessibility Services](#) (SAS) at 905-525-9140 ext. 28652 or sas@mcmaster.ca to make arrangements with a Program Coordinator. For further information, consult McMaster University's [Academic Accommodation of Students with Disabilities](#) policy.

Requests for Relief for Missed Academic Term Work

In the event of an absence for medical or other reasons, students should review and follow the [Policy on Requests for Relief for Missed Academic Term Work](#).

Academic Accommodation for Religious, Indigenous, or Spiritual Observances (RISO)

Students requiring academic accommodation based on religious, Indigenous or spiritual observances should follow the procedures set out in the [RISO](#) policy. Students should submit their request to their Faculty Office ***normally within 10 working days*** of the beginning of term in which they anticipate a need for accommodation or to the Registrar's Office prior to their examinations. Students should also contact their instructors as soon as possible to make alternative arrangements for classes, assignments, and tests.

Copyright and Recording

Students are advised that lectures, demonstrations, performances, and any other course material provided by an instructor include copyright protected works. The Copyright Act and copyright law protect every original literary, dramatic, musical and artistic work, **including lectures** by University instructors.

The recording of lectures, tutorials, or other methods of instruction may occur during a course. Recording may be done by either the instructor for the purpose of authorized distribution, or by a student for the purpose of personal study. Students should be aware that their voice and/or image may be recorded by others during the class. Please speak with the instructor if this is a concern for you.

Extreme Circumstances

The University reserves the right to change the dates and deadlines for any or all courses in extreme circumstances (e.g., severe weather, labour disruptions, etc.). Changes will be communicated through regular McMaster communication channels, such as McMaster Daily News, Avenue to Learn and/or McMaster email.
